

BIG MIKE'S REEL FISHIN'

The objective of our fishing report is to provide our lake users with up-to-date information and to help our anglers on what's working where and when. It is important for everyone to remember that fish have minds of their own and everyday is not going to be the same as the last, but being flexible is vital to consistently catching not just consistently fishing. It is also important to remember that the person providing this information is a fisherman himself and sizes and weights vary slightly from the truth depending on how many times the story has been told.

November 18, 2015

So, you want a fishing report I hear. Ok here we go ---- go fishing because it is great to catch fish.
The end!!

Oh, and use bait to catch them.

Another thought would be bring a jacket cause it is kinda cold in the morning.

The end!!! Again!

A handwritten signature in black ink, appearing to be 'Mike'.

FISHING TIP OF THE YEAR

We have planted over a million fish this fall and trout fishing has been very good with DFW adding a few nice truckloads of catchables lately. We are seeing quite a few limits of respectable fish hitting the scales. Our West Ramp is still open until December 1st, the same day the bald eagles show up to forage and water temp is dropping like a stone as we speak. The fish are scattered all over the massive body of water and working the surface when the sun is high in the sky with a big pile of metal flashy stuff and a crawler on your line always seems to work this time of the year. For shore fishing folks, the magical dough bait on a light lined leader with a sliding sinker will produce as always. I like the light colors of dough bait like white and the patriotic American flag; red, white, and blue as a go-to color when the water is cold. Besides, if you don't catch a fish it makes you feel like you are living the American dream.

Catfish are sleeping and bass are hibernating
