

November 9, 2018

Every time I write a report here, someone says I am telling tall tales about the fishing success. Well, they're probably right, so don't bother coming up to catch any of the four TRUCK loads of fish we just dumped in this bad boy, leave them until spring for me. The mountains are making snow, trees are turning colors, cool temps in the air, and fishing is absolutely fantastic. Everything is working right now but it's not gonna last. I've seen a pile of beautiful limits showing up and everything is 2 lb. line rippers.

It really doesn't get any better than this! Bring a parka and hand warmers but don't miss this one! This is the only place in the world where you can surf, ski, and catch a limit of slabs in a single day.
